Network availability and available

Focus on J&P, tap into BE, understand

Define CS, fit into

CC

applied.

1. CUSTOMER SEGMENT(S)

because, nowadays every common people

need to know the quality of the water they

people who's age is above 18 years because

they clearly know about the technologies we

drink and basically we are targeting the

6. CUSTOMER CONSTRAINTS

device are the biggest issue face by the

customers and need to spend a time to get

daily update, it may high budget for some

5. AVAILABLE SOLUTIONS

In conventional method the quality are monitored by using manual method it may causes some error, but this is an automatic process. Moreover it reduce the man power, so this may causes

searching of alternate job to the workers.

2. JOBS-TO-BE-DONE / PROBLEM

people.

RC

7. BEHAVIOUR

In society people had to know the Quality of water, in conventional method it is impossible to inform people and this leads to many problems like disease. Here we apply new technologies and trends to aware people. This project helps more graduate to work with it.

The reason for the arrival of this project is to maintain and monitor the water used for multiple purpose especially for drinking purpose. We took this project to make a biggest change in society and break the myth of utilization of technologies.

Directly related: find better network availability, calculate the quality and quantity of water.

Indirectly related: customers spend free time on making awareness of the system to others.

3. TRIGGERS

 \mathbf{EM}

By installing this project we can trigger people by seeing their neighbour make the utilization of technology more useful and reading about a more efficient solution in the news.

People felt insecure and unknowledge

4.EMOTIONS: BEFORE / AFTER

about the quality, now they have more

confident about their drinking water.

8. CHANNELS OF BEHAVIOUR

We provide a good source to the

public and we work based on public review.

ONLINE:

public may provide review and rating for the system.

OFFLINE:

Public provide funds to develop the system and make the system to take a next move.
